

GROUP ENVIRONMENT POLICY

Coca-Cola Amatil Limited (CCA), a leading food and beverage manufacturer operating across the Asia Pacific region and one of the top bottlers in the Coca-Cola system, is committed to understanding and minimising any adverse environmental impacts of our beverage manufacturing activities.

Reducing the impact of our business on the environment is a key pillar of CCA's Sustainability Strategy. We do this whilst continuing to meet the expectations of our consumers and customers for quality and service and providing a safe working environment for all employees.

We believe that all Coca-Cola Amatil Limited personnel and everyone associated with the Company have an important role to play in achieving our environmental objectives and targets.

To this end we will:

- Aim to achieve a level of environmental performance, which goes beyond that required for regulatory compliance;
- Include environmental considerations in our annual business plan through the development and regular review of environmental objectives and targets, to ensure that environmental management remains an integral part of our operations;
- Maintain our ISO14001 certified Environmental Management Systems which are based on continual improvement to ensure they remain relevant to our operations and activities and where they aren't currently in place look to expand coverage;
- Educate and equip all our personnel to identify and act upon opportunities to minimise any adverse environmental impacts and issues and to prevent pollution;
- Identify and implement ways to improve the efficiency with which we use resources including water, energy, packaging, chemicals and raw materials;
- Reduce, reuse and recycle resources wherever practicable and ensure that we dispose of our waste safely and with minimal impact;
- Work with our key suppliers, contractors and customers encouraging them to strive to meet the same high environmental standards we impose on ourselves; and
- Work with relevant industry bodies, government agencies, business partners, community groups and other concerned organisations, to promote environmentally sustainable behaviours and practices, as they relate to our activities.
