Footnotes

Baseline is 2019

Note: Data for previous years may not be available in all cases as new targets have been set in 2022; and complete data for CCEP API markets prior to the Acquisition may not be available in all cases. The Acquisition of API completed on 10 May 2021. Sustainability data is calculated on a full year pro forma basis for 2019 baseline, 2020 and 2021 to allow for better period over period comparability. For a full list of CCEP's headline sustainability commitments as part of our This is Forward sustainability action plan, please refer to 'Our headline commitments' on page 27. For details on our approach to reporting and methodology please see our '2022 Sustainability reporting methodology' document on cocacolaep.com/sustainability/download-centre.

- (A) In line with the WRI/WBCSD GHG Protocol, we have restated our baseline 2019, 2020 and 2021 GHG emissions data to include new emission factors and more accurate data.
- (B) Market based approach only
- (C) Packaging is the packaging in the hand of the consumer (Ready to drink packaging). Recyclability criteria based upon market specific recyclability assessments.
- (D) Represents as a weighted average estimate, based on latest national packaging collection rates by material which is then applied to our own packaging volumes.
- (E) Bottles made from 100% recycled PET. Label and cap on these bottles are recyclable, but are not made from recycled plastics.
- (F) Non-alcoholic ready to drink (NARTD) only.
- (G) NARTD, including dairy. Does not include coffee, alcohol, beer or freestyle.
- (H) Does not include coffee, alcohol, beer or Freestyle. Low calorie beverages $\leq 20\text{kcal}/100\text{ml}$. Zero calorie beverages $< 4\text{kcal}/100\text{ml}$
- (I) CCEP full time, part time and temporary active corporate employees. Headcount of employees as at 31 December 2022.
